U. S. SHIPS MAKE IMMIGRATION BID

Board Officials Consider Proposal to Get Most of
Alien Travel.

Diversions of immigration from steamships operated by foreign lines to vessels of the Shipping Board, so far as is possible, is among the attention of administration officials. Chairman Lasker of the Shipping Board has conferred in the past few days with Secretary of Labor Davis, Commissioner General of Immigration Husband and the assistant secretary of labor, seeking to secure for Shipping Board vessels an appreciable part of the immigration business.

Thus far, the proposal has only been discussed, and no concrete action has been taken looking to extensive use of Shipping Board vessels for immigration, but it is understood the State Department will be called into conference within a short time to secure its consent for consular to further use of Shipping Board vessels by immigrants to the United States.

Chairman Lasker is understood to take the stand that vessels of the Shipping Board make practically every port of call in Europe and in the near east from which immigrants come, that they are equipped to handle them in a satisfactory manner and that use of Shipping Board vessels for immigration in an appreciable degree would go far toward putting the American merchant marine on a better basis financially.

Foreign owned steamship lines, it is claimed, make large profits on immigrants brought to this country, which might rightfully go to vessels owned by the Shipping Board. At the same time, it is claimed, masters of Shipping Board vessels will be more careful to abide by the provisions of the percentage immigration law.

Further Efforts at Restriction. Leaders in Congress, it was learned, are making efforts to further restrict immigration to the United States by adoption of a law prohibiting immigrants to come to this country unless they have blood relations here. The Dillingham law, which expires July 1, commonly known as the 3 per cent law, was a compromise measure, proposed after Chairman Johnson of the committee on immigration had put forward the blood relative proposal. Those who administer the present immigration law feel that it is working out very well and that the infrequent violations of quotas will be eliminated entirely when steamship companies are warned that they will be fined for illegal transportation of immigrants to this country.

Discussing the quota law, Commissioner General Husband said that during the past year less than half of one per cent of the immigrants landing at Ellis Island were rejected for all causes. Most of those rejected were turned back because they were likely to become public charges. Mr. Husband said this margin of error is so small as to be almost negligible and is probably not matched by any other administrative bureau.

ARREST OF MORRIS HELD
IMPORTANT IN BOND CASE

Man Out on Probation From Atlanta Taken When Entering New York Apartment.

With the arrest of Henry Morris in New York Wednesday, accused of trying to dispose of government bonds stolen from a mail car between this city and New York, post office inspectors and police believe that they have made an important capture. The bonds were stolen on July 18, 1921, and so far five men and one woman have been taken into custody.

"Goog" Morris, as he is known, was arrested as he was entering his apartment at 8521 Bathgate avenue, New York, by John Gibney, postal inspector, and Detective Sergeant James Riley of the New York police bomb squad. Gibney and Riley had been watching the apartment for several days.

Morris is at present on parole from the federal penitentiary at Atlanta, Ga., having been sentenced to fifteen months for using the mails to defraud. He was released at the end of seven months.

Before being sent to Atlanta Morris had been arrested several times, but ways managed to establish an alibi. He is not now charged with anything, but with having devised a plan whereby they might be disposed of.

ASSIGNED TO ANNAPOLIS. Lieut. Commander Charles L. Best, attached to the U. S. S. Lea, has been assigned to duty at the Annapolis Naval Academy.

WOULD LIFT ALIEN BAN. A liberal immigration policy which would permit desirable aliens to enter the United States without restriction as to their number was urged yesterday at a hearing before the House immigration committee by Louis Marshall, New York attorney, representing the Hebrew Immigrant Sheltering and Aid Society. He expressed opposition both to the 3 per cent restrictive immigration policy of the government and to proposed suspension of immigration during the next few years. In Mr. Marshall's opinion a steady

influx of immigrants, provided they are physically and mentally sound, is highly desirable and would in no way jeopardize social or economic conditions in this country.
